Subject: Next Stormwater Strategy mtg Oct 5
Date: 09/21/2006 05:22 PM
Attachments: [SW Strategy PPT presentation.ppt](#)

Our next scheduled meeting is two weeks from now, on Oct 5. I'm assuming it's "a go" since no one has said otherwise, and we need the time to prep for meeting with LWG.

I drafted a powerpoint presentation with the LWG meeting in mind - not that we necessarily need to use powerpoint, but more as a way to organize the message. It covers our general strategy/path forward. As we discussed today, there are probably some other issues we want to raise at the meeting, or be prepared to respond to.

For our meeting on the 5th, please review the ppt with the following thoughts in mind:

Is this what we want to convey? Is the content accurate?
What other topics do we want to delve in to?
What additional materials/info would we want to bring to support the discussions?
Are there other message or questions that we want to be sure to convey - even if we are just planting the seed for future discussions?

If anyone else has thoughts about our agenda for Oct 5th or other things we should be doing to prep for it - Chime In!

ALSO - When Val proposed meeting on Oct 18th, we (DEQ folks) had a conflict but that's no longer the case. If that date works for others perhaps someone could let Val know.
